

Group *mee*

The background features a dark gray gradient with two sets of wavy, radiating lines. One set is in the upper left, colored in a teal-blue hue, and the other is in the lower right, colored in a warm orange-brown. These lines create a sense of depth and motion.

Transforming companies to be more competitive

Problems

Nowadays there are a multitude of externalities that harm the productivity of our companies. Grupo mee is here to solve them so that you can focus on your passion: your company.

1 Problem

Computer issues.

2 Problem

Outdated processes.
Lack of improvements
in the digital area.

3 Problem

ERP is not 100% adapted
to my company.

Solutions

Technology should not harm productivity, work, or the interaction of your workers and your customers with your company. Perform your duties without worrying about any of this and enjoy your work again.

1 Solution

Computer maintenance
for all types of
companies.

2 Solution

Advice and consultancy in
the field of digital
transformation and process
reengineering.

3 Solution

Consulting, support and
training so that your ERP is
100% synchronized with
your needs.

Companies Groupmee

Through Innovamee and Sapmee, we cover all aspects of Software / Hardware for your company.

We work hard to make sure your work is always easy and enjoyable for you.

How it all started

Group Mee is made up of two independent but interrelated companies whose main objective is to help their clients focus on their "Core Business" and forget about other problems.

INNOVAmee was born more than 10 years ago with the aim of accompanying companies in the innovation, transformation and digital management of their IT assets. All this, through a personalized treatment with clients, unique in the sector.

SAPmee is a business consulting services organization, specialized in advising on process reengineering and technological implementations, whose mission is to help clients make the best decisions and accompany them in achieving their objectives.

The principle of both companies is to help their clients improve, to grow together.

Reason 1

More than 10 years working with companies in different areas and sizes guarantee.

Reason 2

We adapt to your needs so that you do not have to worry about anything related to the Digital and IT field.

Reason 3

We are a trusted partner for your company to offer IT advice. We like to get involved with you.

INNOVAmee

Through our headquarters in Barcelona, we want to be your reference partner in the field of information technology and computer support.

At INNOVAmee we offer all the digital services that your company may need. We have a wide range of services, from digital transformation projects to maintenance of systems configured with the best options offered by the technology market. All this, offering a service that takes care of the particularities of each business so that they do not stop.

Management

On certain occasions, Management is wasting a lot of time on tasks that do not report directly to the company, are tedious, repetitive, etc.

Thanks to the creation of an **intranet** and the use of **Microsoft Office 365**, we will have all the Microsoft licenses up to date, we will have all the information safe on the network and with easy access from anywhere in the world.

When you are away, visiting a client or a business opportunity arises over a meal, you will not have to worry about not carrying the documentation you need and left on the office PC, because your entire company will always be with you.

In addition, with **Power BI (Business Intelligent)** we can create dashboards so that you have at a glance, the current situation of your company in a very intuitive way.

Human Resources

In Innovame we know that one of the most important parts of your company are your employees. That is why creating a good work environment, improving vacation request processes, pooling information in a repository, etc. it is important to you and your employees. They will surely appreciate it.

Through **workflows**, with scheduled messages, we can ensure that HR does not have to worry about requesting requests, documentation, etc. all these documents will be prepared for each employee or department in a way that is easy to manage.

Likewise, the creation of an **employee portal** will facilitate the management of the department.

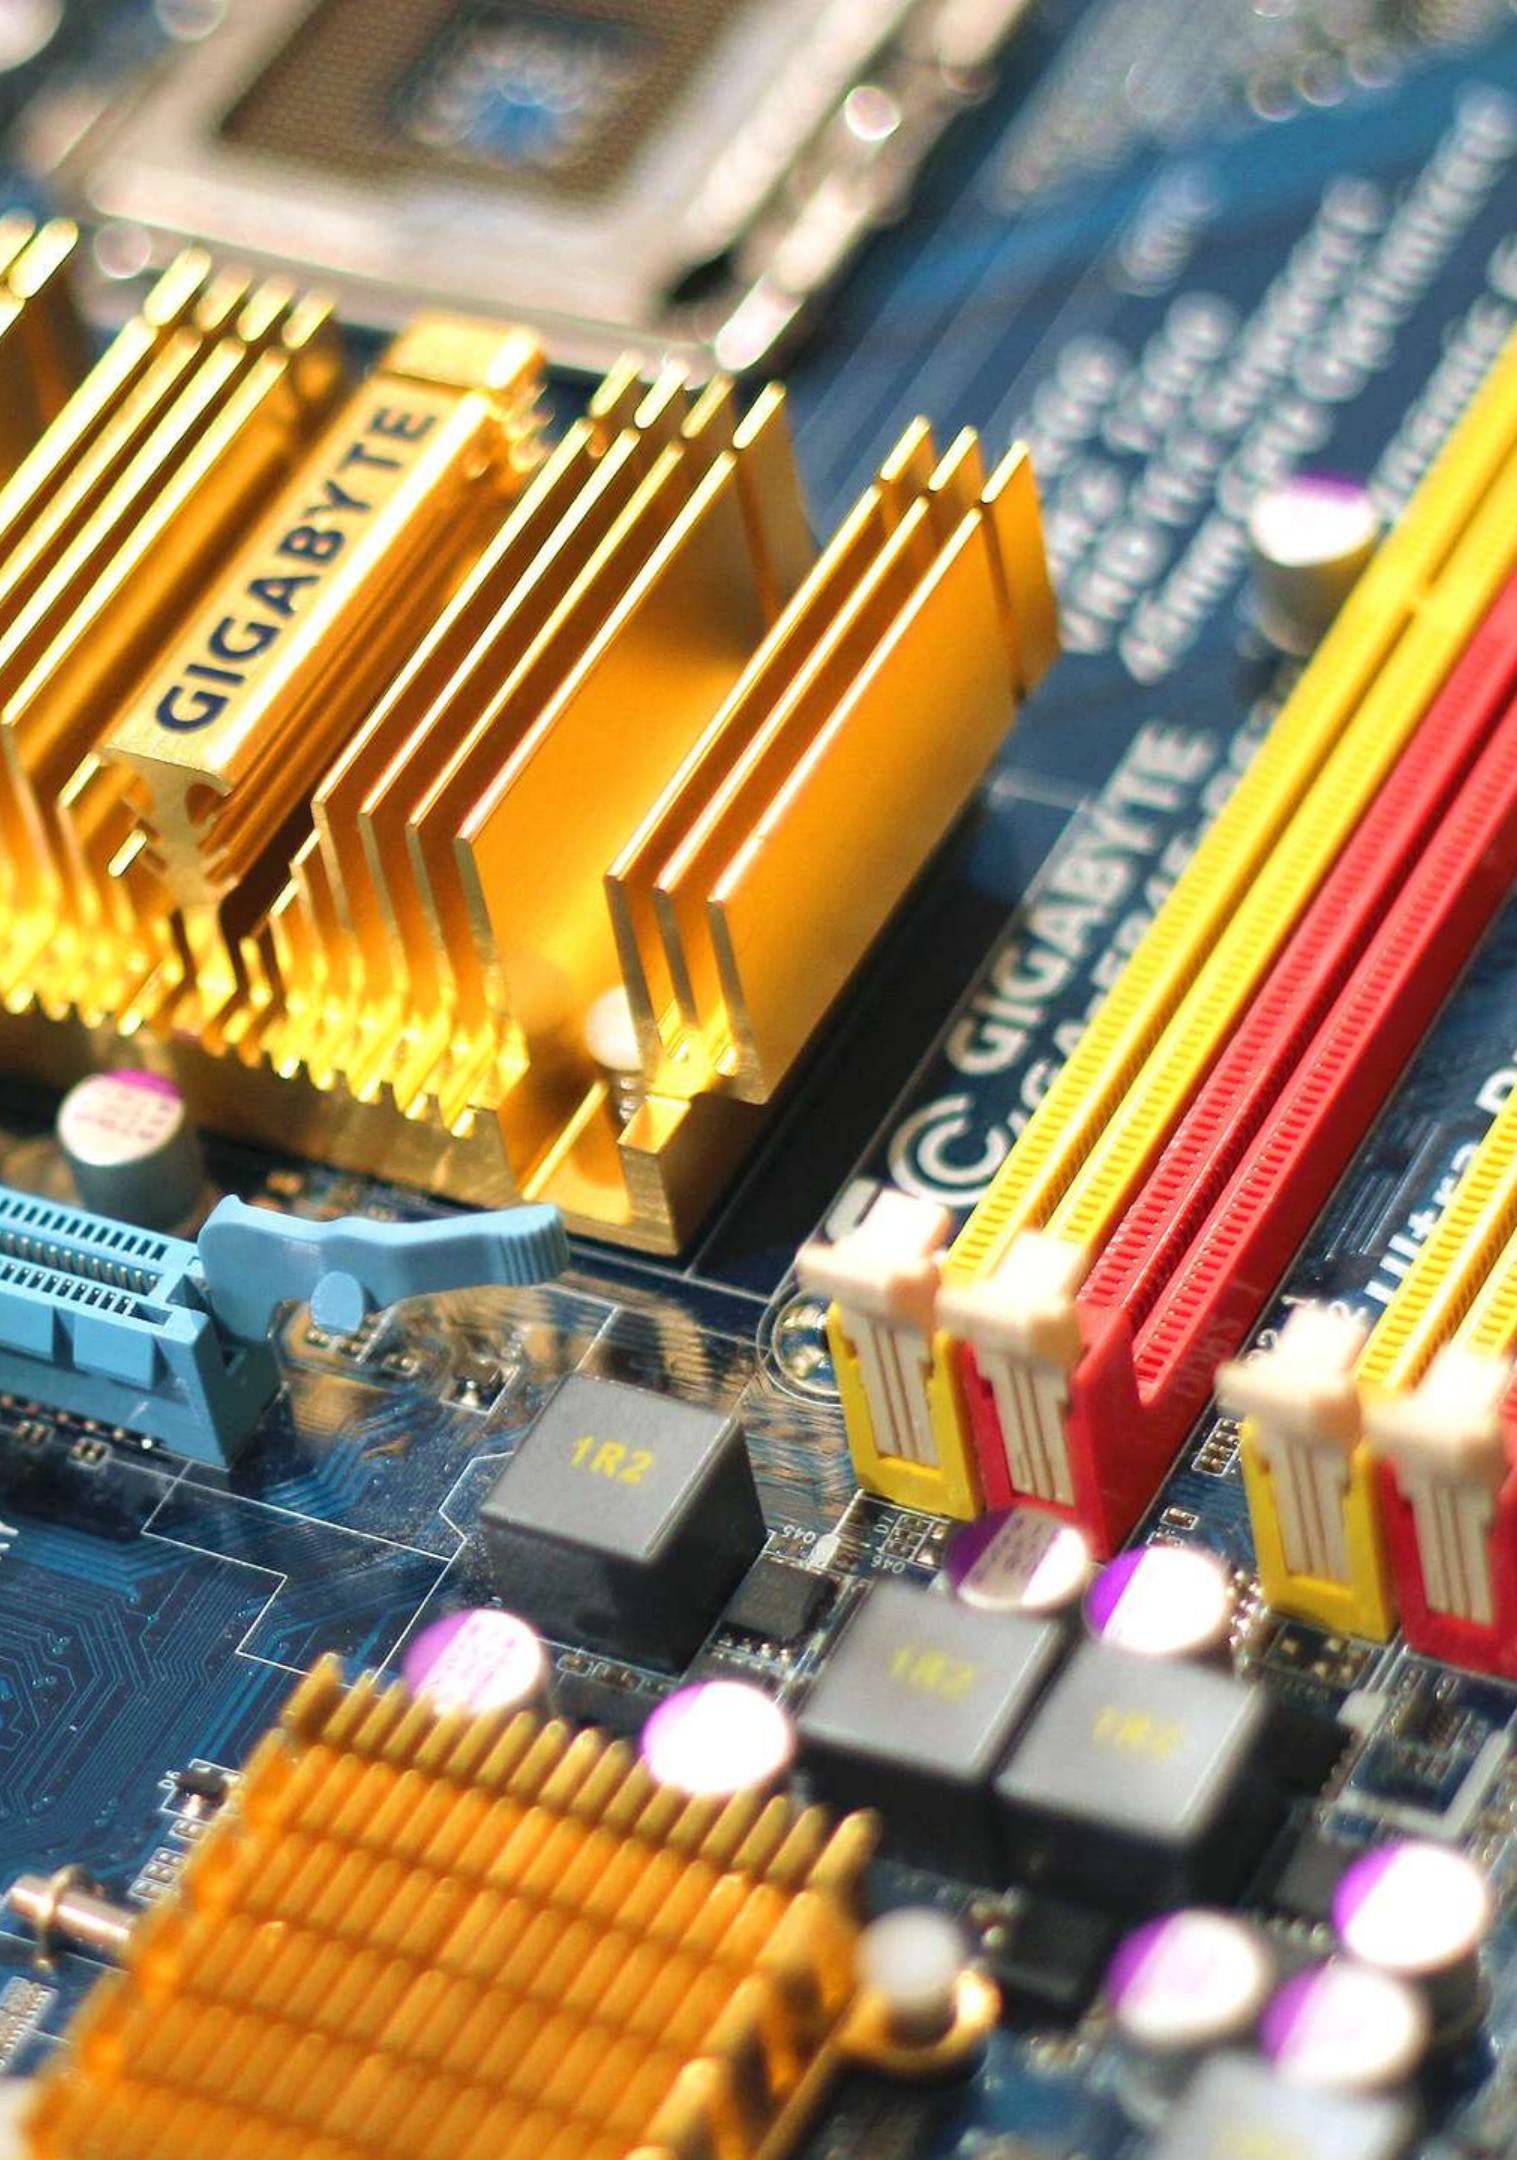

IT / Computing

Not all companies have an IT department or it does not have the time or tools to deal with the different incidents that arise in your company.

At Innovamee, we are specialists in dealing with all these issues, from the most technical to the simplest so that your business never stops. We work with **companies of all sizes**, always putting all our dedication to solve your problems as soon as possible.

We can help you with **wired network setup, server management, data recovery, backup, replacement or hardware upgrades**, etc.

Marketing

We are the partner you need for your marketing department. We make from the most complex **web page** with integrated e-commerce, SEO, SEM, etc. to the website so that your customers and suppliers know where you are and what you are doing.

We design or redesign your **logo**, to improve interaction with your customers and increase engagement with your brand. Your logo says a lot about you.

12

Accounting

In order to have a balanced business, the finance department has to have time and resources to find the best options. For this, thanks to the support of innovamee we can free the accounting department from those tedious tasks thanks to the specific workflows for this department that facilitate the entry of invoices with their digitization.

We are specialists in implementing the solution that best fits your company in terms of **cybersecurity**, so you won't have problems of **phishing** or **malware**. It takes a lot of work to keep the accounting up to date so that in a minute you have a scare of months.

13

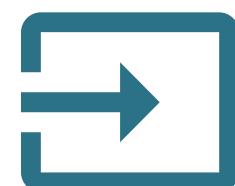

Sales

To make life easier for salespeople and that they can plan, organize and get the most out of their actions, it is important that they have a **CRM**. Through it, you can manage leads, anticipate the next steps with your customers and improve the production of your actions to provide the best service to your customers.

At Innovamee we can help you implement the solution that best suits your company, so that your sales representatives can dedicate themselves to what they do best, explain the benefits of your company and get new clients.

14

Suppliers

Having a good relationship with your suppliers is essential to be able to give a good service to your customers and that they are 100% satisfied with you.

By entering the **digital invoice**, you will facilitate the management of your partners and that of your own accounting team. A win-win for everyone.

15

some of our clients
say

Sergio Romero, MDK

In our **Digital Transformation** process we needed a trusted technological partner. We are grateful for **INNOVAmee's digital support that gives us the continuous technological advice we need.**

Mieko Nagai, Business Operation Manager Tachi-S

I have been working with them for 7 years, starting with the maintenance service of the 4-person office to opening a branch with a production line of a **Japanese multinational company with 80 employees**. They carry all the computer science of our company and plant. Their work has been and is fundamental. They are always there to help us, I owe them a lot as Business Operation Manager.

Emilio Gómez, Pinchazos 24h

We value the close relationship and help that gives us INNOVAmee in the digitalization of our business. So we can provide a fast and efficient service. **By working 24 hours a day 365 days a year, it is essential for us to have a partner that provides agile and precise responses to technological incidents.**

- 13** Share resources locally or in the cloud
- 14** Server configuration and management
- 15** Digital Transformation Consulting

20

Reason 1: Trust in our clients and in us

We want to be the trusted partner in all aspects of SAP.

Reason 2: Professionalism for each of our tasks

We are consultants with extensive experience in all SAP modules. We have worked with the leading companies in all business sectors, so we know the best solution to your problems.

Reason 3: Passionate about our work

We are a young team, who love new challenges and we want you to tell us about them.

SAPmee

We are a professional services company with specialists with more than 20 years of experience in SAP Project Management and Consulting. We are also experts in business process reengineering.

Our vision is based on providing a differential service in the consulting market, in terms of quality, and establishing a relationship of trust and solid collaboration with our client through personalized treatment. The principles of the company are: teamwork, trust and ethical principles, excellence, satisfaction and commitment.

Our main services are framed within:

Digital Transformation and Reengineering

SAP project management and consulting

SAP support

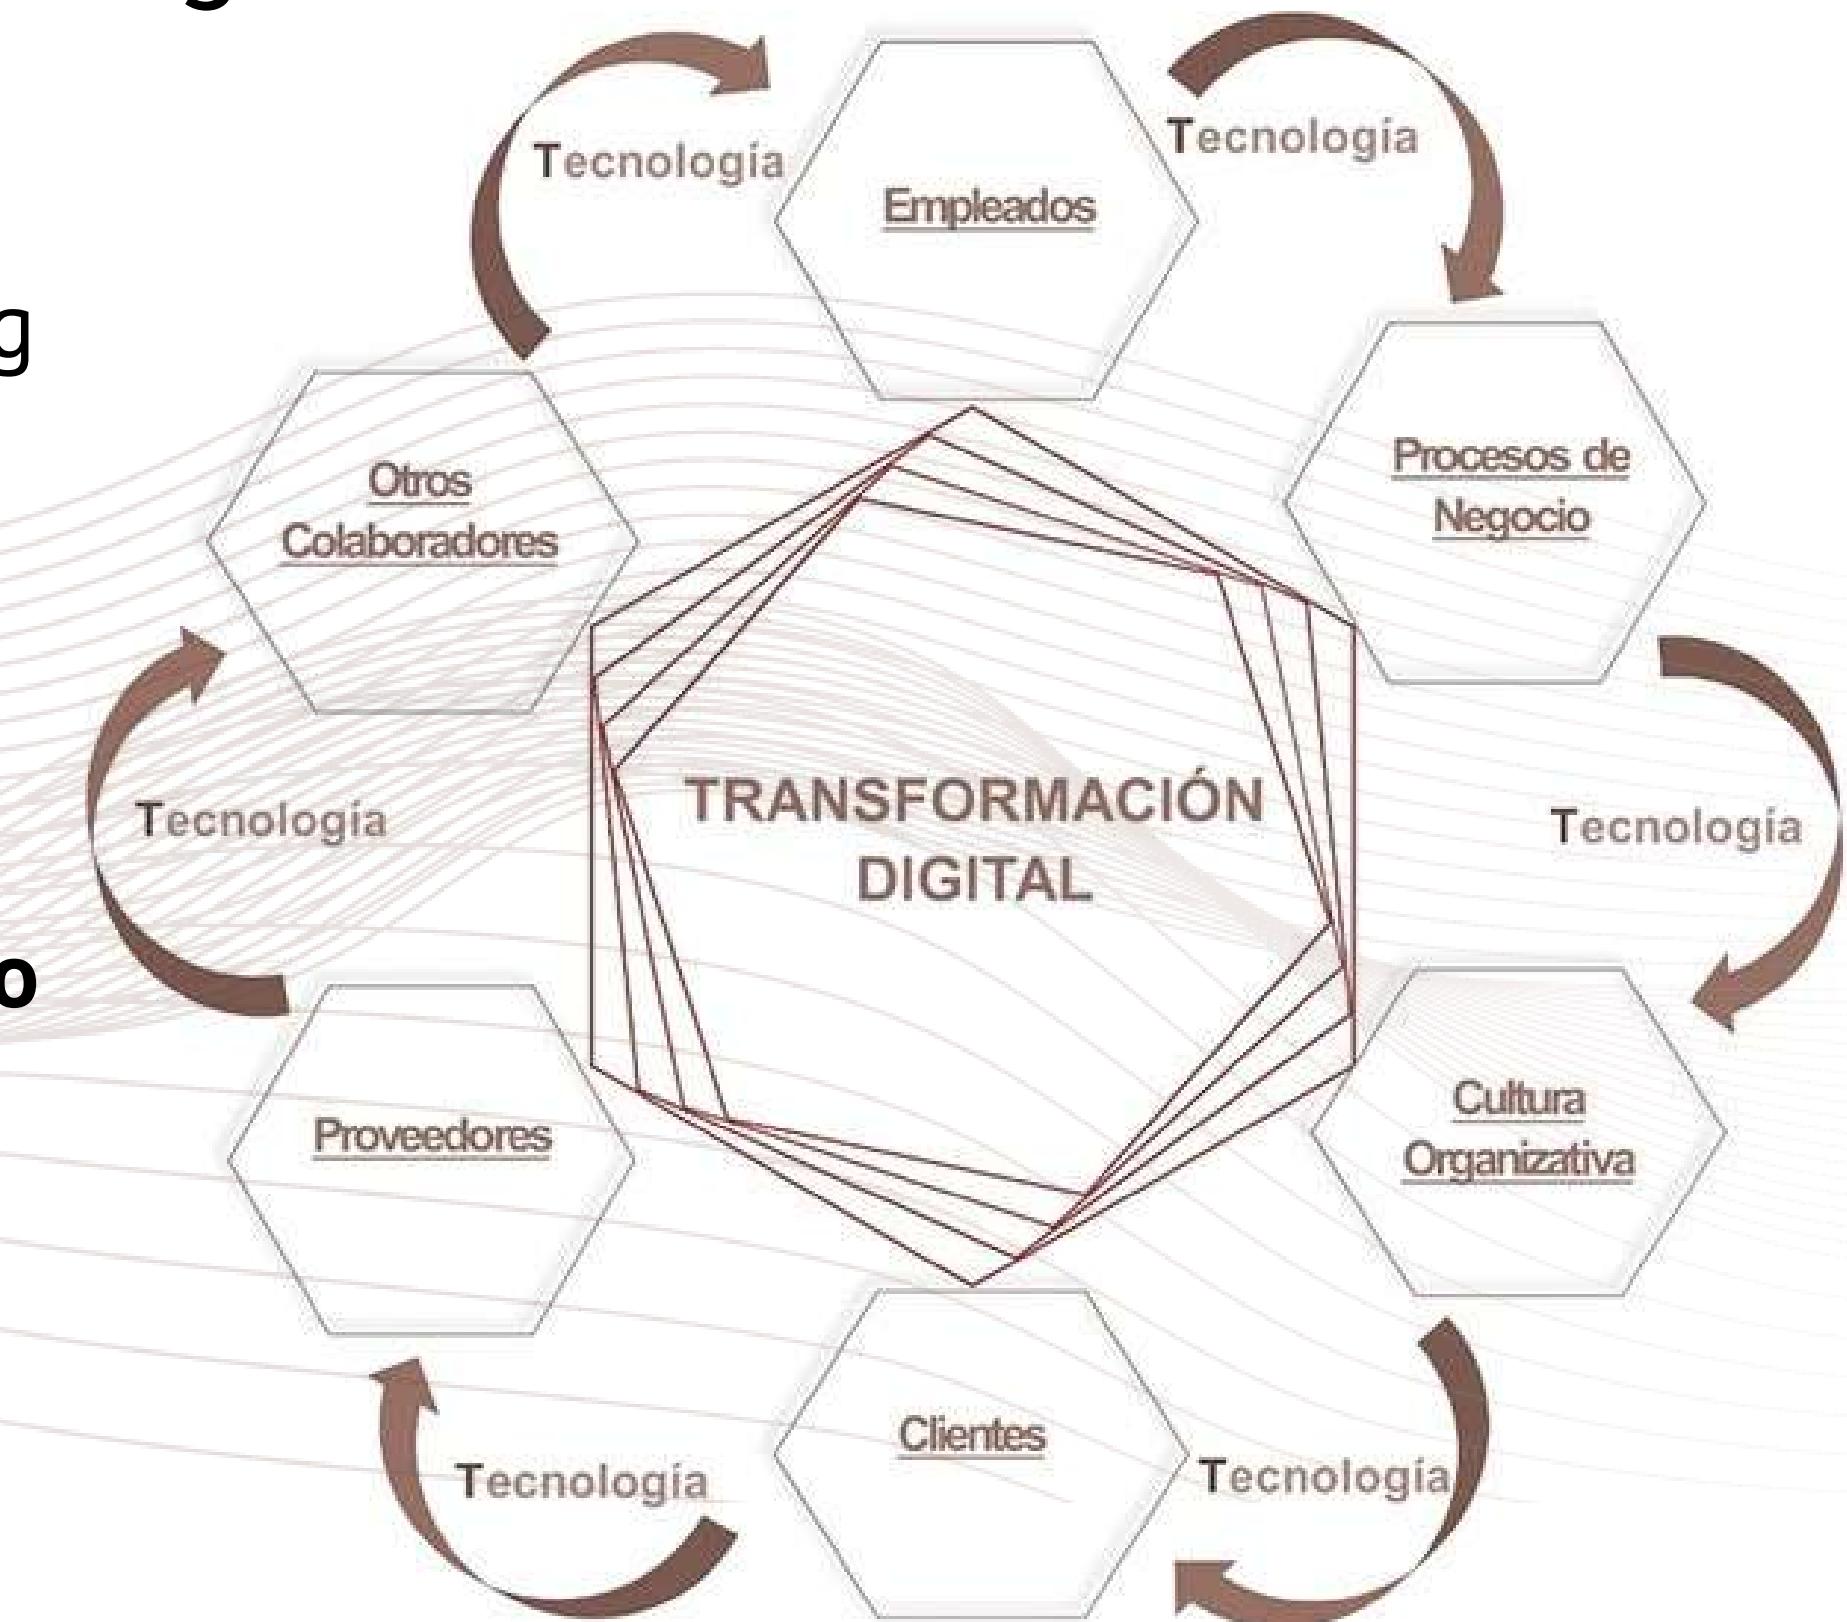

SAP training

Digital Transformation and Reengineering

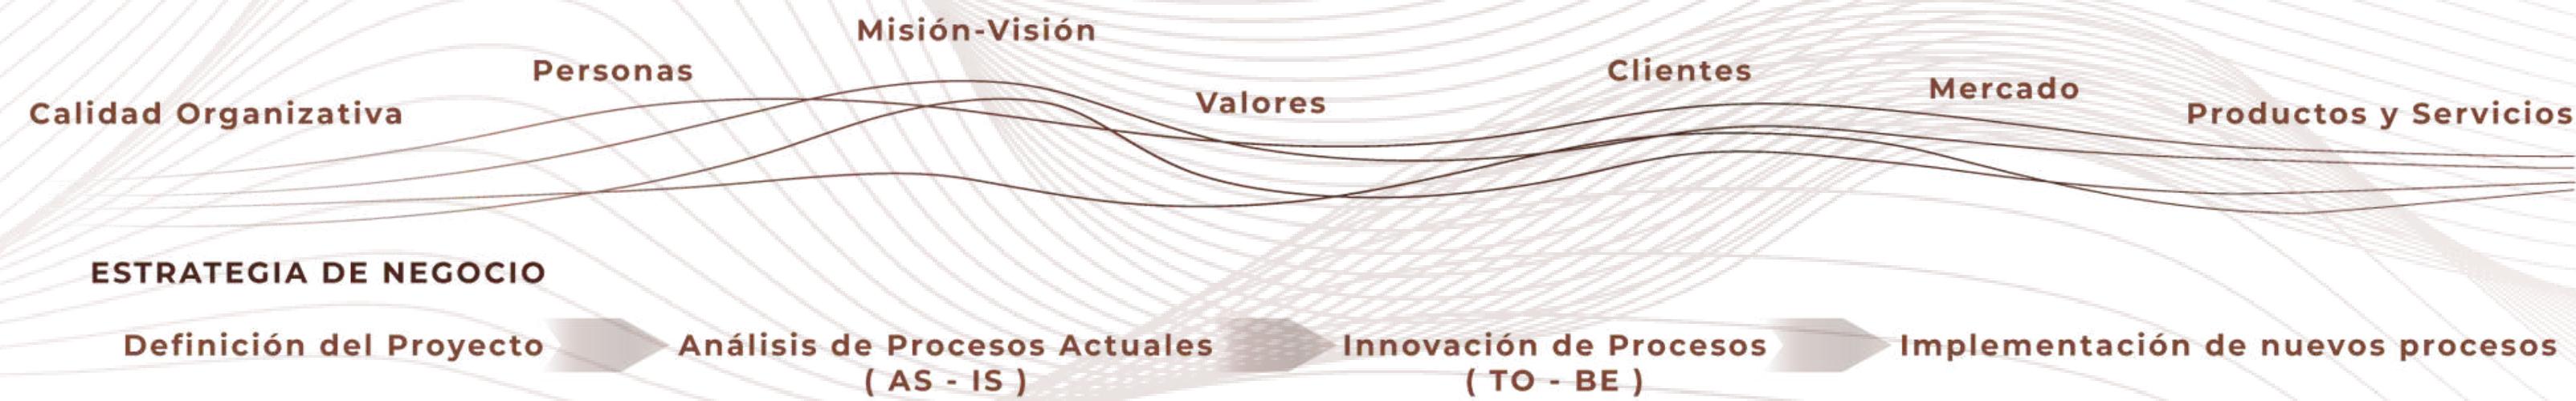

As consulting experts, we see that Digital Transformation is not based only on having a website, having a presence in social networks or having a digital product that responds to the needs of clients. It's not even about using the best technology.

Digital Transformation means being able to use the necessary technology to be able to integrate different areas of the company, increasing competitiveness and offering added value.

Digital Transformation and Reengineering

At SAPmee, aware of the relevance and organizational implications that any Business Process **Reengineering project** can have for our clients, we have designed a project methodology that uses our own criteria around our clients' business as the main triggers of change. This approach facilitates alignment to change:

23

SAP project management and consulting

The wide diversity of SAP functionalities to optimize processes makes the **knowledge**, the **experience** of the SAP Consulting services and the **professional** and **close treatment** essential for the success of any project.

Any SAP Consulting service must be aligned with a technical analysis and programming service in ABAP that, in our case, we manage ourselves and that we also incorporate in our projects. This allows us to offer a complete service to our clients that simplifies and reduces implementation times.

Among our differential solutions, the following stand out:

- **SAP Implementations and Migrations (S/4 HANA).**
- **Roll-outs and global templates.**
- **Adaptation and homogenization of processes in SAP.**

For us, the satisfaction of our clients does not only consist in that their expectations are fulfilled through the SAP Consulting projects where we collaborate, it also consists in that they **think of us as a partner**. The high level of uncertainty in our current environments makes skills such as empathy, proximity and trust increasingly implicit elements in projects. This is the added value that we want to offer our clients.

SAP Support (AM)

At SAPmee, we use our values as a company and our DNA (Commitment, Trust, Excellence and Satisfaction) as bases in the creation of a SAP Support and Maintenance Service (AMS) with a clear differential value: **dimensioning and flexibility according to your needs.**

That is why Sapmee **always goes far beyond** the installation of the standard package or module: we strive **to add value** both before and after production.

SAP Support (AM)

SAPmee differential values:

- **Commitment and trust** in us and in our clients.
- Resource **specialization**.
- Follow-up of the service according to **KPI's defined jointly**.
- Greater **flexibility** that results in an increase in trust.
- **Widely competitive rates**.

In this same sense, given the professionalism of the SAPmee team and its good work, we are in a position to **assign specialized SAP resources** to companies that demand this service.

SAP training

SAPmee defend and promote **continuous training**, both external and internal, because we have proven that knowledge encourages creativity. And this same creativity is, in our opinion, one of the main engines of any successful project. That is why we constantly promote Training among our employees.

Our training approach is **100% adaptive** according to the needs of each of our clients. This level of **customization** allows us to offer a direct and practical approach with clear advantages over general training models.

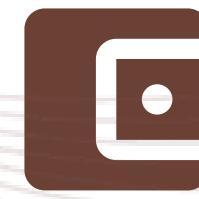

Solutions for all SAP modules

At Sapmee we work with leading companies in all sectors: **retail, Pharma, automotive, e-commerce, food, etc.** Therefore, we have specific solutions to improve the way of working in each area of your company so that it is more effective and productive. We also help you detect opportunities in SAP based on our experience.

Customers Service (CS)

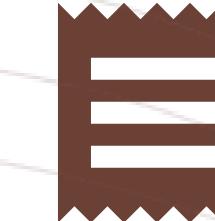

Materials Management (MM)

Controlling (CO)

Financial Accounting (FI)

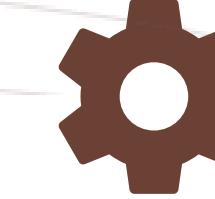

Human Capital Management (HCM)

our customers**

Retail

Pricing Data Maintenance (PDM)

The **Pricing Data Maintenance (PDM)** solution is focused on the purchasing (MM) and Sales (SD) modules. It allows you to update any sales price condition in an agile, secure and direct way.

For this, the **Pricing Data Maintenance (PDM)** solution, through a monitor, allows the user to manage all the company's **prices, promotions and discounts**, in an agile and very simple way.

Value proposal:

- **Updating** of any price condition.
- **Automatic export to excel format**, which facilitates the management and updating of data.
- **Few steps => Expected results.**
- **Experience, Commitment and Personalized Treatment**. So that you can dedicate yourself to value processes.

Pharma

Test Management Tools

The **Test Management Tool** solution allows any SAP customer to have a test kit generation tool. This does not require access to the standard service portal SAP Solution Manager (SSM).

Test Management Tool not only replicates the functionality of SSM, but also allows adjustment for transactions and processes developed specifically for each client.

Value proposal:

- **Expand** the functionality of the SAP Solution Manager (SSM) by adjusting the test sets according to specific processes (and custom developments Z) of each client.
- **Ease** of replicating any master data in bulk.
- Possibility to **integrate processes** through EDI and external systems through FTP.

Automotive

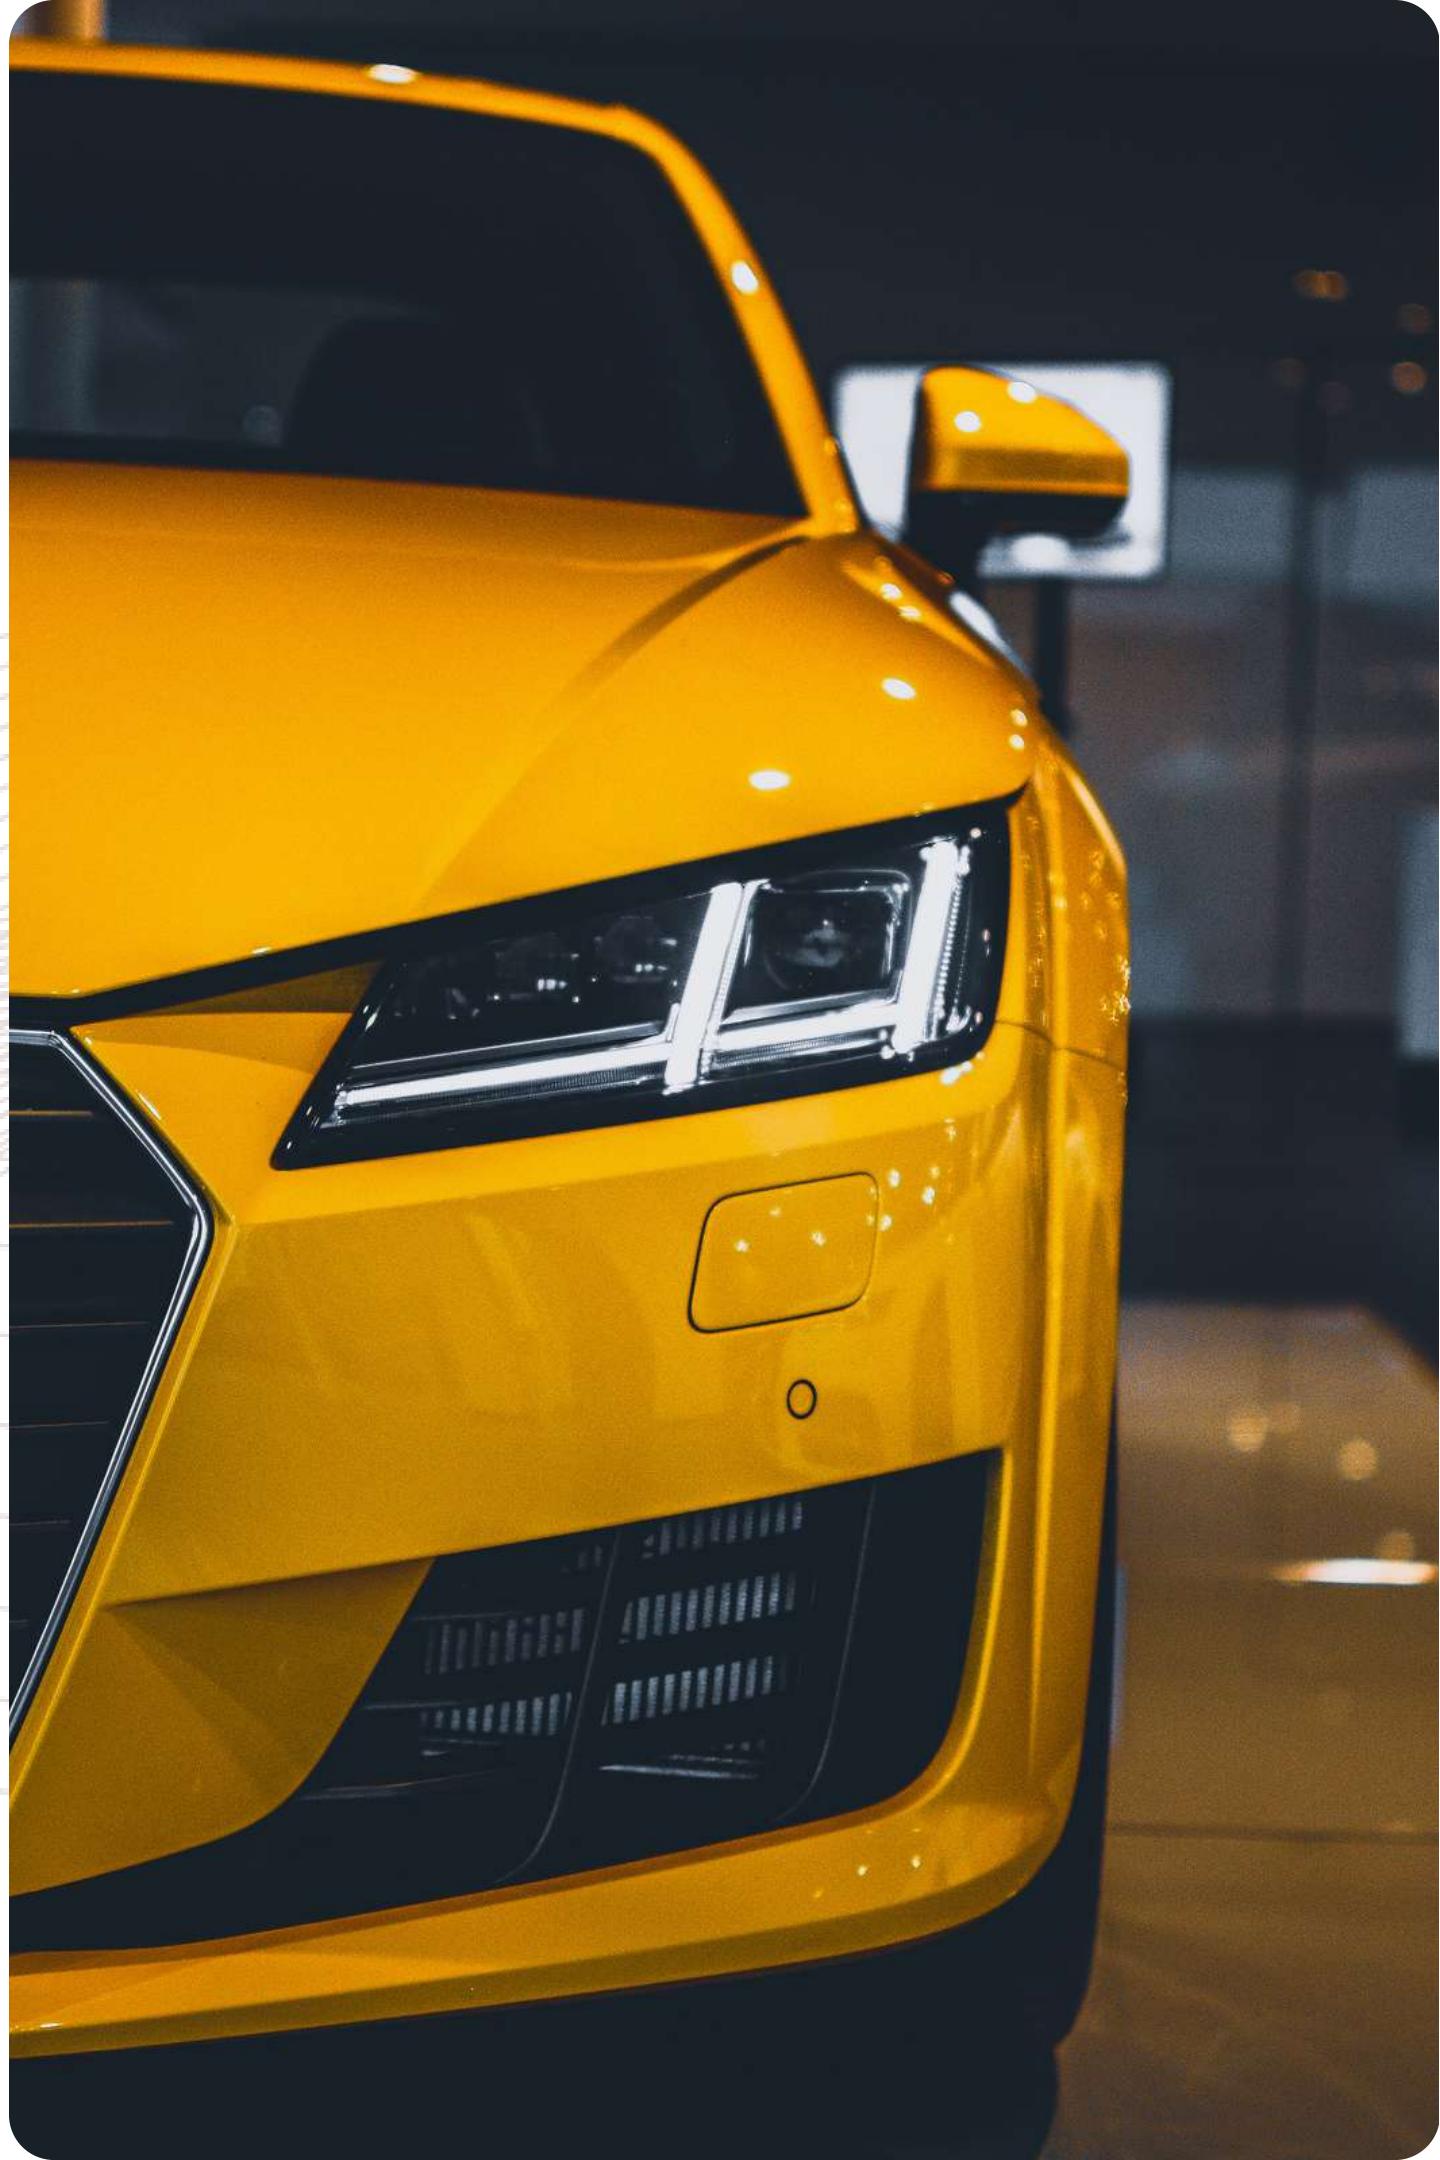

SAP excel Plugin

SAP Excel plugin allows expanding the possibilities offered by the SAP standard, when the user needs to download (locally on the PC) reports and SAP reports.

SAP Excel plugin allows direct downloading of files in XLS format, regardless of the client's Office version, on any type of device and with any Operating System (including Windows, Android and MAC). **The plugin facilitates and simplifies the download to XLS files for any specific client program at the development level.**

Value proposal:

- **Download reports in XLS format for any version of Office.**
- **Easy integration** of the plugin with any ABAP program, facilitating direct download to XLS.
- **Management and viewing of the XLS file**, regardless of the device and Operating System (IPhone, IPad, IMac, Android, etc.).
